

Software Metrics & Project Management

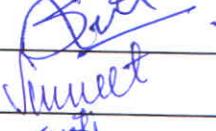

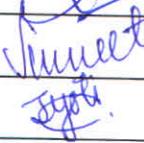

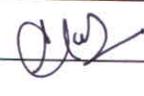

Semester III	Subject Code: MS31901	Lectures: 60
--------------	-----------------------	--------------

Objectives:

The syllabus aims in equipping students with,

- skills that are required to ensure successful medium and large scale software projects
- examining Requirements Elicitation, Project Management, Verification and Validation and Management of Large Software Engineering Projects
- applications of project management techniques for process modeling, planning, estimation, process metrics and risk management; perform software verification and validation using inspections, design and execution of system test cases.
